

KNIFE GRINDING

High Quality Knife and Rubber Grinding

For over 30 years NKS has been recognized in the industry as a leader in stainless steel slitting and slitting technology. As a premier stainless steel service center that specializes in slitting stainless steel from .002" to .120", in various tempers, we require burr-free edges on our slit material. Therefore, we are extremely demanding when it comes to knife edge quality. In collaboration with B2B Industrial Packaging, whose highly experienced representatives are an excellent resource for clients who need help with packaging challenges and logistics, NKS is happy to be able to offer top of the line, knife and rubber grinding services.
